Course overview
This class will cover the major issues in international relations since the end of World War II. We will discuss a variety of topics from both a theoretical and an empirical perspective, including the causes of war; civil wars and ethnic conflict; economic development; international trade; exchange rates and international monetary relations; international capital flows and financial crises; foreign direct investment; globalization and the environment; the UN, the IMF, World Bank, WTO, and other international organizations; and international law and human rights. Although this is by no means a history or economics class, we will cover a fair bit of history, and some international economics, in order to provide background and key context for current debates in international relations. We will spend relatively little time discussing particular countries and their internal politics and problems, although we will talk extensively about the links between domestic politics and IR; our focus will be on states’ relations with each other and the factors determining the nature and outcomes of these international interactions.

The goal for this course is to further your understanding of international relations, but also to help you develop analytical tools for thinking about important questions in world politics regardless of the countries or issues involved. The political science approach to international politics is a mix of ideas and data; the goal is to use conceptual tools that help us understand particular sets of facts about a wide range of topics. My hope is that students will leave the course with a better understanding of world politics and how to think about international affairs in a systematic way.

Course readings
• Textbook: Joshua S. Goldstein and Jon C. Pevehouse, International Relations, 11th ed. 2016 (Indicated by "GP" below.). NOTE: The textbook is also now available in a full-text electronic edition edition, called REVEL, at a substantially reduced cost. This is the recommended option. There is also a combination REVEL/looseleaf text option available. Used print versions of GP (2011 10th edition or later) should be available and are fine, as well.
Here is the direct link to the REVEL website for the course: https://console.pearson.com/enrollment/wncnnm.

Here is the link to the REVEL app in iTunes and Google Play: https://www.pearsonhighered.com/revel/students/mobile-app/?utm_campaign=S17+E.+Notification&utm_medium=Free&utm_source=Notification

- Canvas or online readings – (Indicated by "Canvas" below, or with direct web links). These are equally important!

- I also urge you to start regularly reading a major newspaper/magazine with coverage of international affairs. The Washington Post is now free online for anyone with a .edu email address, and the New York Times is available for campus delivery or online subscription at discounted student rates. Other sources of good international news are the the Financial Times, the Economist, the Guardian, the Wall Street Journal, and the BBC.

Course requirements and evaluation:
This class will consist of two weekly lectures and one weekly discussion section. I expect you to have done the readings by the date on the syllabus. There is a moderate amount of reading, but none of it is particularly dense. I expect you to attend class and discussion section regularly and do the readings on schedule.

EXAMINATIONS: There will be three written examinations in the course: two midterms and a final. The weighting of the exams (as part of your overall grade) will be as follows:

- MIDTERM 1 20%
- MIDTERM 2 25%
- FINAL 35%

PARTICIPATION (20%): Attendance at every session—lectures and sections—is expected and will be factored into this grade, though you will need to participate regularly and thoughtfully to get full credit. Discussion sections will focus closely on the readings, and you are expected to have done them in advance and come prepared to discuss them in detail. Please note that, while topics from lecture will also be discussed, sections are not intended to be a substitute for lecture attendance (and vice versa).

CLASS POLICIES AND IMPORTANT NOTES

- Anything covered in class, the syllabus readings, or the news articles discussed in the course is fair game for the exams. So, just doing the reading on the last night before the exam means an almost certain failing grade. Come to class and do your readings carefully and on time. *Note that even readings that have not been explicitly addressed in lecture or discussion section may be covered in the exams!*

- The best way to reach me is via email at copelovitch@wisc.edu or to speak with me before/after class.

- **Attendance:** If you know that you will be absent from class for religious or other reasons that can be known in advance, please let me know. If you have to miss class due to sickness or family emergencies, please keep your TA or me as informed as possible. *Remember that participation is fully 20% of your grade, and unexcused/unexplained absences will be noted accordingly.*

- **Computers and other electronic devices:** Electronic devices (including laptops, tablets, smart phones, electronic recording devices, etc.) cannot be used during class. Please see your TA if you think you might be exempt from this requirement for medical or learning-related reasons.”

- **McBurney accommodations:** Students needing special accommodations to ensure full participation in this course should contact me and your TA as early as possible. All information will remain confidential. You also may contact the McBurney Disability Resource Center regarding questions about campus policies/services.

- **Slides and notes:** My policy is to post my Powerpoint slides for each week after the Wednesday lecture on the Canvas website. Since this means that you will have a full set of my slides to study for both exams, I put quite a bit of material on the slides. This means that you do not need – and are unlikely to be able – to take “transcript notes” (i.e., to copy everything on the slides). *Your best strategy is to listen carefully to the lectures and take selective notes on things mentioned that are important but not necessarily already on the slides. Then, go back to review the printed slides later on as needed. Please note, also, that the slides alone are not a substitute for attending lecture AND doing the readings.* Much of the material is unlikely to make sense if you do not attend class.

- **Grading:** Re-evaluating grades (please read very carefully!): My policy is the following:
  - You have to wait for 24 hours after the assignment has been returned before issuing any complaints. Before talking to me, you must first speak with your TA directly about your exam and grade.
  - If, after speaking to your TA, you still wish to dispute your grade, the procedure is as
follows. You have to draft a 1-2 page double-spaced memo outlining why you deserve a better grade. Please note that this memo has to be based entirely on the merit of your own work, i.e., it cannot be based on comparisons with the grades of other students.

- Your grade will then be fully re-evaluated. This means that I may revise the grade downward as well as upward. So please be certain that you have a very specific and justifiable reason before asking us to make any changes – this is not a risk-free process!

**Exams:** The exam schedule is set. Clear your schedules now. There will be **no make-up examinations** unless you can provide proper documentation that your absence is due to a) a genuine family emergency, b) illness or injury, or c) travel away from Madison for university-related (!) obligations. If an exam is missed for a valid reason, I will give you a substitute assignment. *This will be an essay of 8-10 pages based on the material covered in the exam and will be due four days after the date of the missed exam.* Please do not ask me for make-up exams (either late or early) for other reasons. In a class of 200+ students, we simply can’t do this for reasons of fairness and logistics.

**Cheating** and plagiarism are very serious offenses that will not be tolerated in the course. You will receive a failing grade for the class, and the reason for the grade will be noted in your transcript.
